

CS6W50NT Career Development Learning (CDL) Form

Student

Student Londonmet ID: 24045922

Student Name: Manoj Katuwal

College E-mail ID: np05cp4a240306@iic.edu.np

Mobile No: 9804064003

Student's work/placement address: Byte Gurkha / Sanischare Road, Birtamode, Jhapa

Employer

Employer Name: Byte Gurkha

Employer's Address including department: Birtamod, jhapa / Web Development
Department

Company Supervisor's Name and Position: Paras Nepal, Founder / Senior Web
Developer

Company Supervisor's Tel No: 9749242343 / 9826992297

Company Supervisor's email address: parasnep1@gmail.com

Career Related Learning Activity

Start Date: 23th June, 2026

End Date (if known):

Your role at the placement (position): MERN Stack Intern

Brief description of your work at the placement: As a MERN Stack Intern, I developed and maintained scalable web applications by building responsive user interfaces with React and creating secure RESTful APIs using Node.js and Express. I designed efficient database schemas in MongoDB, implemented secure JWT authentication, and managed application

states for seamless user experiences. Collaborating via Git, I actively debugged code, optimized performance, and contributed to the full software development lifecycle.

Proposed learning outcomes from the Career-Development Learning Activity:

Learning Outcome ID	Learning Outcomes	Activities and Tasks	Evidence
L01	Communication Skills	I will communicate professionally with my supervisor and team members by participating in meetings, discussing assigned tasks, asking questions when clarification is required, sharing project progress regularly, and maintaining clear communication throughout the internship.	I will provide meeting notes, daily or weekly progress reports, communication records, project documentation, and supervisor feedback demonstrating effective communication skills.
L02	Time Management	I will organize my daily workload, prioritize assigned tasks, meet project deadlines, manage development activities efficiently, and maintain consistent progress throughout the internship period.	I will provide task schedules, progress tracking reports, completed milestone records, weekly work logs, and supervisor feedback demonstrating effective time management.
L03	Teamwork and Collaboration	I will work collaboratively with my supervisor and team members by sharing ideas, participating in discussions, supporting team activities, respecting different opinions, and contributing positively to project development.	I will provide meeting records, task collaboration evidence, shared project documentation, GitHub collaboration history, and supervisor feedback demonstrating teamwork and collaboration.
L04	Problem Solving	I will identify technical challenges during project development, analyze possible solutions, debug application issues, evaluate different approaches, and implement appropriate solutions to improve the overall system.	I will provide debugging records, bug reports, updated source code, GitHub commit history, resolved issue documentation, and supervisor feedback demonstrating problem-solving ability.

L05	Self-Learning and Professional Development	I will continuously improve my technical knowledge by learning new technologies, studying official documentation, practicing coding regularly, accepting constructive feedback, and applying newly learned concepts within the project.	I will provide learning notes, GitHub commits, coding practice examples, completed learning resources, reflection reports, and supervisor feedback demonstrating continuous self-improvement.
L06	Professional Ethics	I will maintain professional ethics by respecting confidential project information, following organizational policies, writing responsible code, respecting intellectual property, and maintaining professional behavior throughout the internship.	I will provide reflection reports, documentation of secure development practices, coding standards followed during development, and supervisor feedback demonstrating ethical and professional conduct.
L07	Front-End Development (React.js)	I will design and develop responsive, interactive, and user-friendly web applications using React.js and Tailwind CSS. I will create reusable components, manage application state, implement routing, handle forms, integrate REST APIs, and optimize the frontend for better performance and user experience.	I will provide React source code, completed UI components, GitHub repository records, responsive interface screenshots, project demonstrations, frontend documentation, and supervisor feedback demonstrating frontend development skills.
LO8	Back-End Development (Node.js & Express.js)	I will develop scalable server-side applications using Node.js and Express.js by creating RESTful APIs, implementing middleware, handling server-side business logic, managing routes, validating requests, handling errors, and improving application performance and maintainability.	I will provide backend source code, API documentation, Express route files, middleware implementation, GitHub commit history, Postman testing screenshots, and supervisor feedback demonstrating backend development skills.
L09	Database Management (MongoDB)	I will design, implement, and manage MongoDB databases using Mongoose by creating schemas and models, performing CRUD operations, validating data, optimizing database queries, and maintaining efficient database structures to support application requirements.	I will provide MongoDB schema files, Mongoose models, CRUD implementation source code, database screenshots, GitHub repository records, and supervisor feedback demonstrating database management skills.

L010	REST API Development and Integration	I will develop and integrate RESTful APIs by establishing communication between frontend and backend systems using Axios or Fetch API, handling asynchronous requests and responses, implementing authentication where required, and ensuring reliable data exchange across the application.	I will provide REST API source code, API integration examples, Postman testing results, frontend API implementation code, GitHub commits, application screenshots, and supervisor feedback demonstrating successful API development and integration.
L011	Authentication and Authorization	I will implement secure authentication and authorization mechanisms using JSON Web Token (JWT), encrypted password storage, protected routes, user role management, and session handling to ensure secure access to application resources.	I will provide authentication source code, JWT implementation files, protected route configuration, login and registration module screenshots, GitHub repository records, and supervisor feedback demonstrating secure authentication implementation.
L012	Testing and Debugging	I will test frontend and backend functionalities by performing API testing using Postman, validating user inputs, identifying application bugs, debugging source code, verifying implemented fixes, and ensuring stable application performance before deployment.	I will provide Postman API testing screenshots, debugging logs, bug reports, updated source code, GitHub commits, application screenshots, and supervisor feedback demonstrating testing and debugging activities.
L013	Version Control using Git and GitHub	I will use Git and GitHub to manage project source code by creating repositories, maintaining version history, creating branches, committing code regularly, resolving merge conflicts, and tracking project development throughout the internship.	I will provide GitHub repository links, commit history screenshots, branch management records, pull request records (if applicable), project version history, and supervisor feedback demonstrating effective version control practices.
L014	Code Quality and Software Development Practices	I will develop clean, modular, reusable, and maintainable code by following coding standards, implementing appropriate project structures, improving code readability, reducing duplication, and	I will provide project source code, folder structure documentation, GitHub repository records, code review feedback (if available), updated implementation records,

		applying software development best practices throughout the project lifecycle.	and supervisor feedback demonstrating high-quality software development practices.

This form is approved by CDL academic supervisor

Academic Supervisor Name: Mr. Kushal Tamang

Academic Supervisor Signature:

Date of Signature:

If you work at an external company or organization, the following “Health and Safety checklist” form must be completed before your placement can be approved.

 LONDON METROPOLITAN UNIVERSITY
External Career-Development Learning (PLACEMENT) PROVIDER
HEALTH AND SAFETY CHECKLIST

Name of the Placement Provider (Company name): Byte Gurkha
 Placement site Supervisor: Paras Nepal
 Supervisor's Position: Senior MERN Stack Developer
 Address: Sanischare Road, Birtamode, Jhapa
 Email: parasnep1@gmail.com
 Telephone: 9749242343

		Yes	No
1	Do you have a written Health & Safety policy?	Yes	
2	Do you have a policy regarding health and safety training for people working in your undertaking, including use of vehicles, plant and equipment, and will you provide all necessary health and safety training for the student?	Yes	
3	Is the organisation registered with? (tick as appropriate) (a) the Health & Safety Executive or (b) the Local Authority Environmental Health Department		No
4	Insurance (a) Is Employer and Public Liability Insurance which will cover the duration of the placement? (b) Employer and Public Liability Insurance policy number _____ (c) Will your insurance cover any liability incurred by a placement student as a result of his/her duties as an employee?		No
5	Risk Assessment (a) Have you carried out any risk assessment of your work practices to identify possible risks whether to your own employees or to others within your undertaking? (b) Are risk assessments kept under regular review? (c) Are the results of risk assessment implemented?	Yes	

6	Accidents and Incidents (a)Is there a formal procedure for reporting and recording accidents and incidents in accordance with RIDDOR (Reporting of Injuries, Disease & Dangerous Occurrence Regulations)? (b)Have you procedures to be followed in the event of serious and imminent danger to people at work in your undertaking? (c)Will you report to the university all recorded accidents involving placement students? (d)Will you report to the university any sickness involving placement students which may be attributable to the work.	Yes	
---	--	-----	--

The above statements are true to the best of my knowledge and belief.
