

## Phase 1: Computer Ma Git Ko Shuruwat (Local Fundamentals)

Sabai bhanda pahila computer ma euta folder banau (Example: `my-website`) ani terminal/cmd kholera tyo folder bhitra jau.

### Step 1: `git init` (Shuru Garne)

- **K ho?** Yo command le tyo folder lai Git Repository banaucha. Abadehi Git le tyo folder ko sabbai changes track garna thalcha.
- **Command:** `git init`

### Step 2: `git add` (Tayari Stage Ma Rakhne)

- Timile folder bhitra `index.html` file banayou re. Tyo file lai save gurnu bhanda pahila "Staging Area" (tayari abastha) ma rakhnu parcha.
- **Command:** `git add index.html` (Sabai files ekaichoti thapna `git add .` hanne)

### Step 3: `git commit` (Permanently Save Garne)

- **K ho?** Yo bhaneko timile gareko kamko photo khichera, euta ID diyera history ma sadhai ko lagi save gareko ho.
- **Command:** `git commit -m "First page banaye"`
- (Note: `-m` pachhi timile k kam gareko ho, tyo message lekhna parchha).

### Step 4: `git log` (History Herne)

- **K ho?** Ahilesammako sabbai commits (saves) ko history list herne kam garcha.
  - **Command:** `git log --oneline`
- 

## Phase 2: Branching & Merging (Hanga Biga Banaune)

Main website safe rakhna hami xuttai branch (hanga) ma naya feature test garchau.

### Step 5: `git branch` (Naya Branch Banaune)

- **K ho?** Main line (`main` branch) bata euta xuttai track chaine bhaye naya branch banaine.
- **Command:** `git branch naya-design`
- (Tyo branch bhitra gayer kam garna `git checkout naya-design` hanne).

### Step 6: `git merge` (Kam Misauri Garne)

- Timile `naya-design` branch ma kam sakkyou ani tyo design main website ma thapna man lagyo. Pahila `git checkout main` garera main branch ma pharkine, ani yo hanne:
- **Command:** `git merge naya-design`

### Step 7: `git rebase` (History Linear Banaune)

- **K ho?** Yo pani merge jastai ho, tara yesle history ko lines haru banngo-tinngo nabanaera, ekdam sidha line ma euta mathi arko commits setup gardinchha.
  - **Command:** `git rebase main`
- 

## Phase 3: Advanced Local Tools

### Step 8: `git stash` (Kam Lukayera Rakhne)

- Timi euta adhuwa kam gardai xau tara tyo nasakidai urgent arko bug fix garna paryo bhane, adhuwa kam lai safe thau ma temporary lukayera rakhna milcha.
- **Command:** `git stash`
- (Pachhi tyo kam firta nikalna `git stash pop` hanne).

### Step 9: `git cherry-pick` (Euta Commit Matra Liyera Aaune)

- Sathi ko branch bata sabbai changes chahidaina, tara usle gareko euta specific commit matra timro branch ma halna man lagyo bhane yo use huncha.
- **Command:** `git cherry-pick <commit-id>`

### Step 10: `git reset` VS `git revert` (Galti Sudharne)

- `git reset --hard <commit-id>`: Yo danger ho, yesle timro file ko naya changes sabbai udachha ani purano tyo commit ko time ma puryauxa.
  - `git revert <commit-id>`: Yo safe ho, yesle purano galti delete gardaina, tara tyo galtilai cancel garne euta naya safe commit thapidincha.
- 

## Phase 4: GitHub Ko Collaboration

GitHub bhanya cloud ho jahan internet ma code rakhincha.

1. **Fork:** GitHub ma kasaile banako project man paryo bhane, `Fork` button thichda tyo project ko kapi timro afno GitHub account ma aunchha.
2. **Pull Request (PR):** Timile arko kasailo code ma kura thapyou ani tyo real project ko owner lai "Mero code check garera timro ma halda" bhannu nai Pull Request ho.

3. **Issues:** Project ma k k bugs xan, k k naya kura thapne ho bhanyera sathi haru bich online discuss garne dashboard ho.
  4. **Releases:** Website ko Version 1.0, Version 2.0 jasta stable versions banayera download garna milne link launch garnu ho.
- 

## Phase 5: GitHub Actions (Robot Worker)

Yo chai GitHub bhitra ko automatic robot ho. Timile code `git push` garne bitikkai yesle afei kaam thalcha.

- Yesle code ma error x ki xaina afei test garcha.
  - Sabai thik x bhane website lai afei internet server ma rakhdincha (Deploy).
  - Yesko lagi `.github/workflows/test.yml` bhanni folder ra file banayera YAML code lekhnu parcha.
-
